TATEH EXTRU FLOAT

PREMIUM

Tateh Extrufloat is a new innovative product of Tateh Aqua Feeds. It is an extruded floating pellet especially designed for tilapia and milkfish culture in fishponds. The feed contains ingredients that make it not only complementary to the natural food available in ponds but also highly palatable to the fish. Higher palatability means higher feed ingestion rate and less wastage. The extrusion process also makes the feed highly digestible which means more of it is converted into fish meat. Higher ingestion rate and higher digestibility means a lower FCR and therefore higher profitability.

Tateh Extrufloat is available in Grower and Finisher.

Feed Type	Packaging (kg)	Pellet Size	Guaranteed Proximate Analysis				
		Diameter (mm)	Crude Protein (min)	Crude Fat (min)	Crude Fiber (min)	Crude Ash (max)	Moisture (max)
Starter	25	3.8 - 4.2	31.0	7.0	6.0	12.0	12.0
Grower	25	3.3 - 3.7	29.0	6.0	6.0	12.0	12.0
Finisher	25	3.8 - 4.2	27.0	6.0	6.0	12.0	12.0

Product benefits:

- 80% minimum extruded floating rate
- Ideal pellet size for energy conservation during feeding
- Thick and quality fish meat; for milkfish, thick fat belly deposit
- Promotes optimum growth rate
- Low FCR
- Environment-friendly
